

# MBioLIMS, the complete, modular and evolutive LIMS

DISCOVER OUR LABORATORY MANAGEMENT SOLUTION  
 SPECIALLY DEVELOPED FOR LIFE SCIENCES

**COMPLETE** – MBioLIMS revolutionizes the management of your laboratory on a daily basis: from samples storage, high throughput experiments, project management, analysis tools, to sharing results in real-time.

**MODULAR** – a wide range of flexible modules available.

**EVOLUTIVE** – an evolutive and integrated solution that fits seamlessly and rapidly to the evolving requirements of your laboratory.

## Modul-Bio LIMS® Advantages

### Enterprise Platform

An enterprise platform based on robust and proven technologies (Java Enterprise, Oracle, MapleSoft, Sun Microsystems, Zebra).

### Personalized Solution

A personalized study of your project in the set up and implementation for a solution tailored to your needs. Customized and complete integration of the different components (barcode labelling, server, installation, backup) for a turn-key solution.

### Reactiveness and Strong Expertise

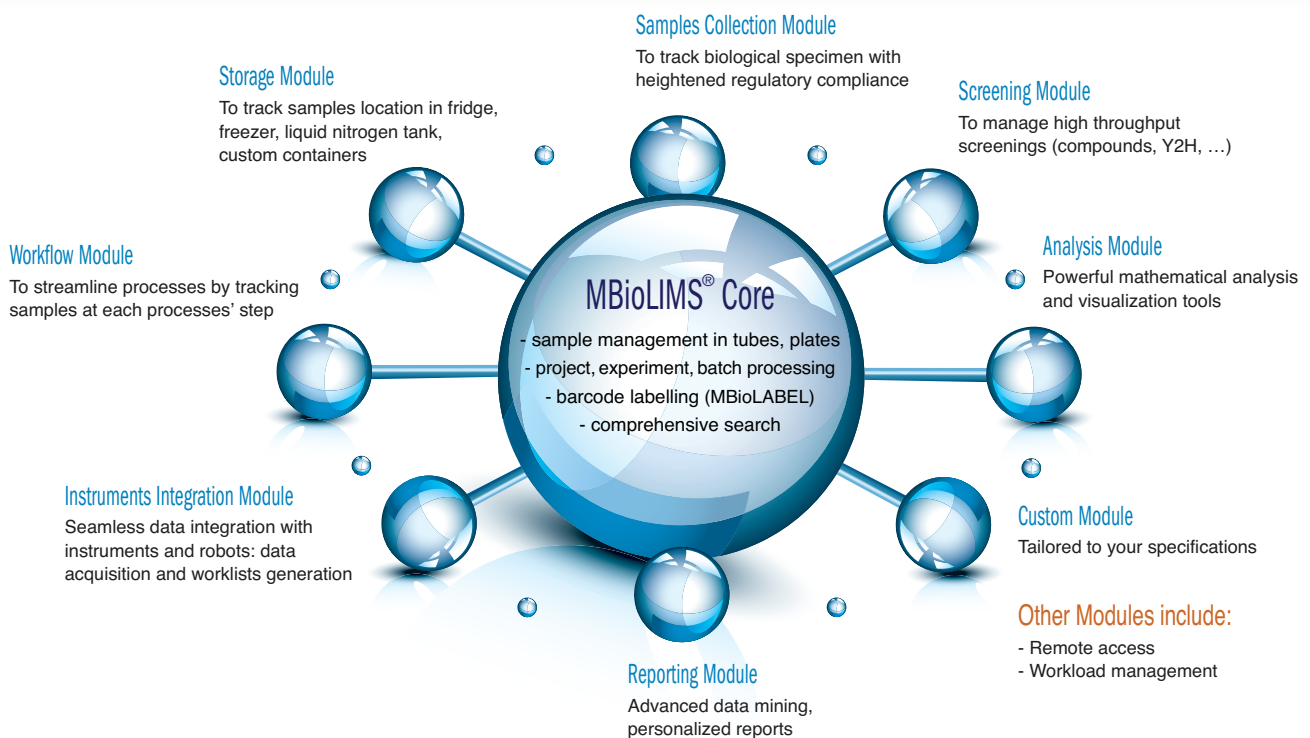

Modul-Bio's team combines reactivity and strong expertise to deploy new functionalities and provide excellent customer training and support.

For MBioLIMS demonstration please contact

CUSTOMIZED SOFTWARE SOLUTIONS

All of our software solutions are based on MBioLIMS® Core. Plug-in modules can be added as well as specific/custom modules to meet your requirements.

**MBioLIMS®**  
Advanced LIMS Solutions

**Quality and Security**

**INCREASE AND ENHANCE YOUR PRODUCTIVITY**

Centralized architecture, role based access, 100% WEB, server installation, easy multi-site deployment.  
Operating systems: Linux, Windows

**INTEGRATES TO YOUR QUALITY CONTROL MANAGEMENT**

FDA 21 CFR Part 11, GLP compliance

**INSURE DATA CONFIDENTIALITY**

Crypted and secured transmission

**FLEXIBLE AND INTUITIVE INTERFACE**

**MBioLIMS® : A flexible LIMS for industrial and academic laboratories in Life Science**

**Client Testimonials**

“Modul-Bio understands complex biological processes. Their workflow and analysis modules are highly flexible.”

- Dr. Mariana Kuras, Director of Research, BioSystems International

“The software allows for open architecture with the possibility to add new fields. It contains very powerful reporting and search tools.”

- Dr. Mohammad Afshar, CEO, Ariana Pharmaceuticals

“MBioLIMS® fits our laboratory; it is very well adapted to our processes. Very quickly in production, we saved 100 KEuros the first year thanks to the storage module ”

- Dr. Boris Calmels, Cell and Gene therapy Facility, Institut Paoli Calmettes

Modul-Bio has created software for the following laboratories with various types of activities:
